INFORMATION

- **Authn** is a proof of identity, not of citizenship
- Verify identity using Secure QR Code/Offline XML/Online Authorization
- This is electronically generated letter

- [illegible]

- **Aadhaar** is valid throughout the country.
- **Aadhaar** helps you avail various Government and non-Government services easily.
- Keep your mobile number & email ID updated in **Aadhaar**.
- Carry **Aadhaar** in your smart phone—use **mAadhaar App**.

There are several ways to find the area of a circle. One way is to use the formula $A = \pi r^2$, where A is the area, π is the constant 3.14, and r is the radius. Another way is to use the formula $A = \frac{1}{2} C r$, where A is the area, C is the circumference, and r is the radius. A third way is to use the formula $A = \frac{1}{2} C d$, where A is the area, C is the circumference, and d is the diameter.
