A semester credit is awarded for each fifteen (15) hours of classroom work or the equivalent in laboratory, clinical, workshop, fieldwork or approved independent study.

COURSE NUMBERING SYSTEM

From the academic year 2003-2004, courses are identified by a six (6) character alphanumeric code. The first three characters identify the course name abbreviation; the first digit indicates course complexity. Thus, '0' denotes a remedial course, '1' – a level one course, '2', '3', '4', '5' and '6' successively. The course number is formed from the second and third digits.

GRADING SYSTEM

Courses pursued before the academic year 1992-1993 are based on a trimester system. Those undertaken thereafter, are based on a semester system. Courses introduced after the academic year 2002-2003 are based on a credit system. The following letter grades are used to determine the quality of the student's achievement.
