Personal Statement: I am a dedicated, student-centered educator with three years of teaching experience at the secondary level, delivering Health and Family Life Education (HFLE) to forms 1–5 and Literacy to forms 1–2 students. Currently, I hold a Bachelor of Science in Public Health, an Associate Degree in Hospitality Management, and certification in Psychological First Aid in Disaster Management. Throughout my short but effective stint of being an educator I serve as Subject Coordinator for the Health and Family Life Education Department and actively contribute to school leadership through extensive involvement on the Examination Committee, Graduation Committee, Fundraising Committee, and as a Student Council Guide. My passion for education grew throughout the years particularly in discovering ways to improve educational outcomes and crafting meaningful learning experiences that meet the diverse needs of students. My experiences from classroom practice and leadership roles have kindled a fascination in curriculum development, instructional design, and overall strategies that are aimed at promoting student involvement, achievement, and general participation in their learning.
